Attorney Docket No. CYBRP001.US04

JUL 07 2006

1. (currently amended) An exercise system comprising:

a local system including an exercise apparatus having an actuator and an associated local computer, said local computer being able to control said actuator;

a remote system including at least one remote computer; and

an Internet connection that at least part-time couples said local system to said remote system for data communication between said local system and said remote system, such that said local system is interposed between said remote computer and said actuator, whereby said remote system cannot directly control [[to]] said actuator.

2. (original) An exercise system as recited in claim 1 wherein said local system is one of a plurality of local systems, each of which is in at least part-time communication with said remote computer.

3. (previously presented) An exercise system as recited in claim 1 further comprising a server system including at least one server computer in at least part-time communication with said remote computer.

4. (original) An exercise system as recited in claim 3 wherein said remote system is one of a plurality of remote systems, and each of which is in at least part-time communication with said server system.

5. (previously presented) An exercise system as recited in claim 1, wherein said exercise apparatus further has a sensor, said local computer being able to receive

Attorney Docket No. CYBRP001.US04

signals from said sensor, such that said local system is interposed between said remote computer and said sensor, whereby said remote system cannot directly receive signals from said sensor.

6. (previously presented) A local system as recited in claim 1 wherein said local computer is located internally to said exercise apparatus.

7. (previously presented) A local system as recited in claim 1 wherein said local computer may include at least a portion of a modified script.

8. (original) A local system as recited in claim 5 wherein said exercise apparatus includes at least one of a bicycle, a rowing machine, a step machine, and a resistance trainer.

9. (previously presented) A local system as recited in claim 1 wherein said control may include a resistance setting for said exercise apparatus.

10. (previously presented) A local system comprising:

at least one exercise apparatus; and

at least one associated local computer controlling an operation of said exercise apparatus based upon a modifiable script provided by said local computer.

Attorney Docket No. CYBRP001.US04

11. (original) A local system as recited in claim 10 wherein said local computer is located internally to said exercise apparatus, and wherein said script is modifiable externally to said exercise apparatus.

12. (currently amended) A local system as recited in claim 11 wherein said local computer can communicate with a remote system to provide said remote system with local system data concerning said use of said exercise apparatus, and to receive remote system data including at least a portion of a modified script to be stored in said a read/write memory.

13. (original) A local system as recited in claim 12 wherein said exercise apparatus includes at least one of a bicycle, a rowing machine, a step machine, and a resistance trainer.

14. (original) A local system as recited in claim 12 wherein said script includes a resistance setting for said exercise apparatus.
